BYCOR COMPLETES PINNACLE EXECUTIVE CENTRE PROJECT

BYCOR General Contractors has completed the Pinnacle Executive Centre project, a 108,844 r.s.f., 5-story, Class "A" office building located at 10920 Via Frontera in San Diego. "Erection of the 1,082 tons of structural steel used in this project took 21 crane days, 23 iron workers, 11,000 high strength bolts, and 2,150 pieces of structural steel," stated Ken Price, President of International Iron Products, the structural steel subcontractor.

Designed by Leary Childs Mascari Warner Architects, the all steel and concrete structure possesses a stone and glass exterior and offers panoramic views of the Rancho Bernardo Valley and surrounding mountains. Building features include a prestigious 2-story lobby, flexible floor plans allowing for a variety of suite sizes from 1,000 r.s.f. to full floors, and shower and locker facilities for tenant use. Two-thirds of the building's parking spaces will be provided by a 95,000 s.f. subterranean parking structure. BYCOR also provided comprehensive preconstruction services.

Headquartered on Marindustry Place in San Diego, BYCOR General Contractors is celebrating 25 years of providing tenant improvement and shell construction services in San Diego County.
